name	price	link
electrical components:		
Microcontroller: Raspberry Pi, 4 2GB	40 €	link
Camera: MakerHawk RPi 5MP 1080p / 30FPS	12 €	link
4G module: Tianjie 3G 4G LTE USB WiFi modem	21 €	link
2x Servomotors: EMAX ES09MA	12 €	link
2x Brushless motor: Mitoot 5008 335KV	60 €	link
2x ESC: 40A 6s BLHeli32	40 €	link
2x Step down converter (one for logic, one for servos)	5 €	link
2x Batterie 6s 18650 2600mAh	16 €	link
2x BMS (6S, 40A)	4 €	link
1x charger (25.2V, 2A)	11 €	link
100x header connectors male and female	3 €	link
16 AWG wire 3pin 1m	6 €	link
5m heatshrink tube (2mm and 4mm)	4 €	link
body parts		
springs 1.5x18x35mm	4 €	link
100x M3 screws 10mm, 8mm, 6mm	6 €	link
100x M3 threaded inserts	4 €	link
Filament solid: PLA+; 1kg	15 €	link
Filament flexible: Filaflex 82A; 0.25kg	20 €	link
total:	**283 €**	
additionals		
Newone PCB (just a wire replacement but keeps everthing clean)	25 €	link
3D printer: Creality Ender 3 Pro	180 €	link
Gamepad: Logitech F310 (but every PC gamepad will work)	30 €	link
Arduino (to configure the BLHeli32 esc's)	5 €	link
Renting a server, we recoment:	3€/month	link

SIM card + contract (depends on where you live). Note: for the 4G module and SIM card you can use a old phone with hotspot.
